EXPERTISE

**ERGONOMICS ISN'T A LUXURY
— IT'S SELF-PRESERVATION AND EFFICIENCY! —**

Message from the Director:

“As we look to the future of our business, we see our customers’ expectations changing as they become increasingly demanding in terms of ergonomics, safety and cost savings. The success of our company over the past 55 years is linked to our ability to constantly innovate and offer a Premium service.”

Olivier Bidaux

**The responsiveness and technical know-how of a
French manufacturer since 1967,
servicing professionals in more than 30 countries**

MADE IN FRANCE

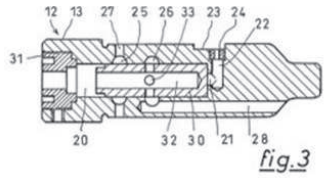

3 PATENTS FILED

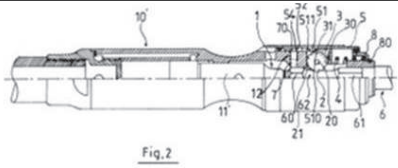

55 YEARS OF EXPERIENCE

MABI

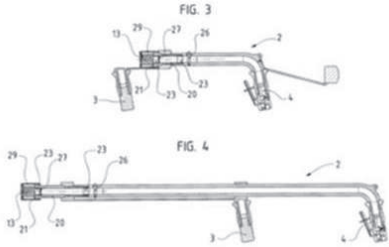

1989 : Marc Bidaux patent
"Percussion Hammer"

1995: Marc Bidaux patent
"Anti-Vibration system in the head"

2010 : Olivier Bidaux patent
"Anti-Vibration system in the handle"

MABI PHILOSOPHY

The MABI difference

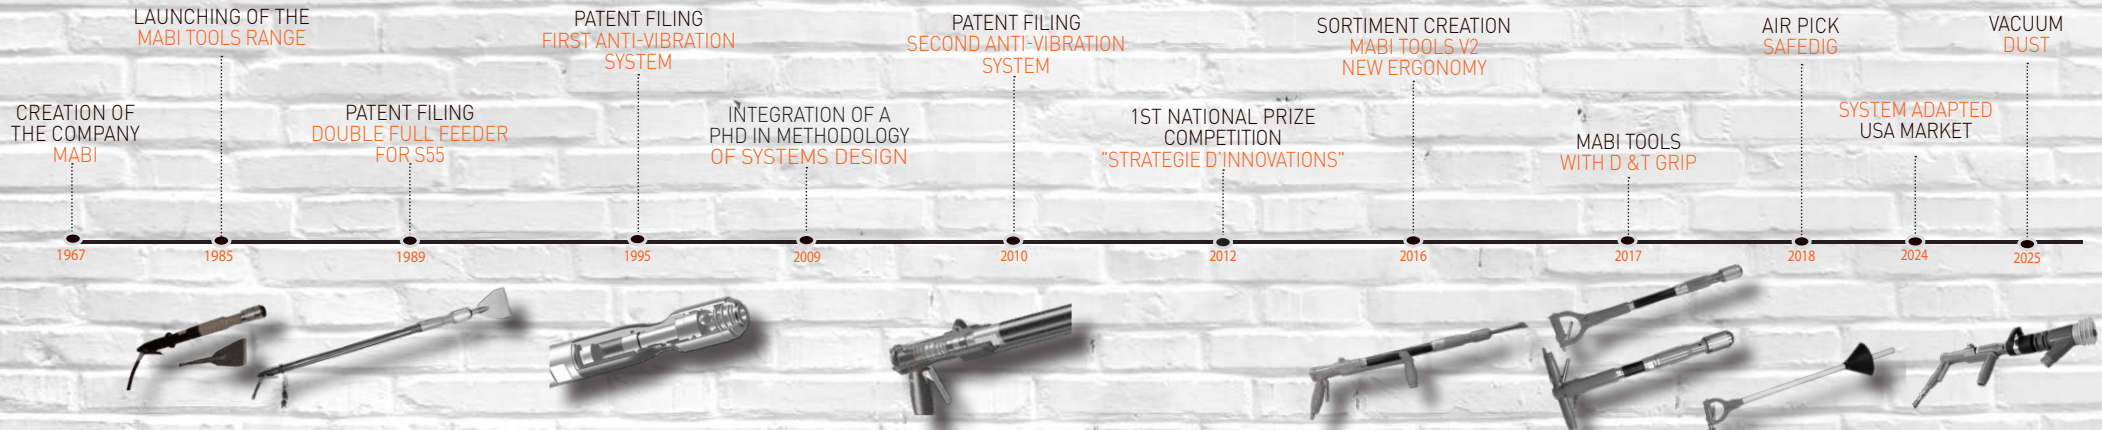

Company founder Marc Bidaux invented the first ergonomic scraper in 1967, his philosophy that an easy-to-use tool is a productive tool continues to drive our development.

MABI registered the first patent for a high percussion system for stripping walls and floors.

Prioritising operator comfort and safety in line with tool performance. From design to manufacture, MABI are committed to a high level of comma quality, ensuring reliability in extreme environments under intensive use.

OVER 50 YEARS OF INNOVATION

OUR KEY MILESTONES 1967-2025

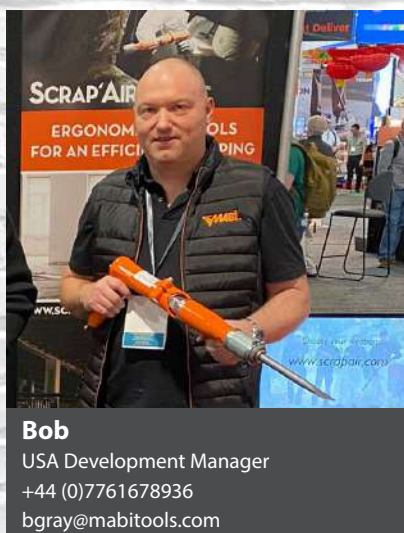

THE TEAM

A team of passionate experts at your service!

As specialists in professional tools, Team MABI are with you every day, saving you time and optimising your efficiency.

SCRAP'AIR BENEFITS: a range adapted to each project.

4 POWERS

Select the power according to the materials that need to be removed:

15 JOULES:

Recommended for fragile covering such as wood, stone, peeling coatings.

25 JOULES:

Perfect for buildings renovations, asbestos, glues, tiles and slab removal.

30 JOULES

Adapted to industrial maintenance : ovens, mixers, truck mixer.

35 JOULES:

Suitable for floors stripping and water-proofing removal, excavation.

4 HANDLES

The ergonomic design of the different grips ensures optimal work positions.

Pistol Grip

Straight Grip

T-Grip

D-Grip

3 LENGTHS

Select the handle length for comfort and reach according to application needs. Custom lengths available for specialist applications.

50 CM

80 CM

120 CM

2 ANTI-VIBRATION SYSTEMS

Two Patented Anti-Vibration Systems isolate and protect the user from harmful vibration.

ANTI-VIBRATION IN THE NOZZLE HEAD

ANTI-VIBRATION IN THE HANDLE AND IN THE NOZZLE HEAD

SCRAP'AIR[®]

by MABI

1. COMFORT AND PERFORMANCE

- Extended reach protecting the operator from debris.
- The perfect match of Power and Lightweight construction maximises productivity and comfort.
- Ergonomic design to offer the most comfortable working position.
- Multiple available lengths to provide safe reach to areas otherwise hard to access with standard chisel tools, preventing overreaching and work in dangerous confined spaces.

2. PATENTED ANTI VIBRATION SYSTEMS

- Dual Anti-Vibration systems protect operators from dangerous excessive levels of vibration. A 60% reduction offers operators a safer, more comfortable and therefore, more productive operation.

3. SAFETY-TOOL RETAINER

Rugged quick change retainer prevents failures, securing the chisel with no risk of ejection.

4. TOOLS

- A wide range of 25 specialist chisels offer solutions to the most demanding applications.

5. ERGONOMIC GRIPS

- The combination of strong polymer materials with cast aluminium construction produces a lightweight yet strong tool perfectly suited for easy operation with maximum performance.

LIGHT-HANDLING-EFFICIENT

USER NEED

Companies are looking for the best solutions to increase productivity and improve working conditions for their employees. They have a duty to protect their employees' health and guarantee their safety.

MABI offers its partners our benefit of 55 years' experience:

"We work with our customers and users to develop innovative, high-performance equipment".

5 GOOD REASONS TO OFFER THE SCRAP'AIR RANGE:

- **Unique technology:** make a difference with innovative, high-quality equipment.
- **Technical and sales support:** team training and a strong digital presence with video tutorials.
- **User-friendly:** Fast deployment, simple cleaning/decontamination and easy maintenance.
- **Reliability** thanks to pneumatic design and high-quality components.
- **Over 55 years' experience** with constant improvements in product safety and ergonomics.

RENOVATION - INDUSTRIAL - EXCAVATION

ADVANTAGES

- **Improve working positions**, handling and efficiency through ergonomic handles designed to optimise comfort angles.
- **Protection against musculoskeletal disorders (MSD)**, by extending operating time with two patented anti-vibration systems that reduce vibrations.
- **High productivity thanks to pneumatic power**, ensuring unrivalled power-to-weight ratio and enabling use in extreme environments (dust, heat, humidity, corrosive atmosphere, etc.).
- **Work safely** with easy, intuitive start-up.
- **Improve your return on investment**, with French manufacturing quality and a high-end design that limits servicing and maintenance costs.

ERGONOMICS - SAFETY - COST SAVINGS

CUSTOMER SUPPORT

Sales & Marketing: Tailored support to enhance your sales. With strategic support, knowledge and marketing tools we effectively support growing the MABI product line in your business.

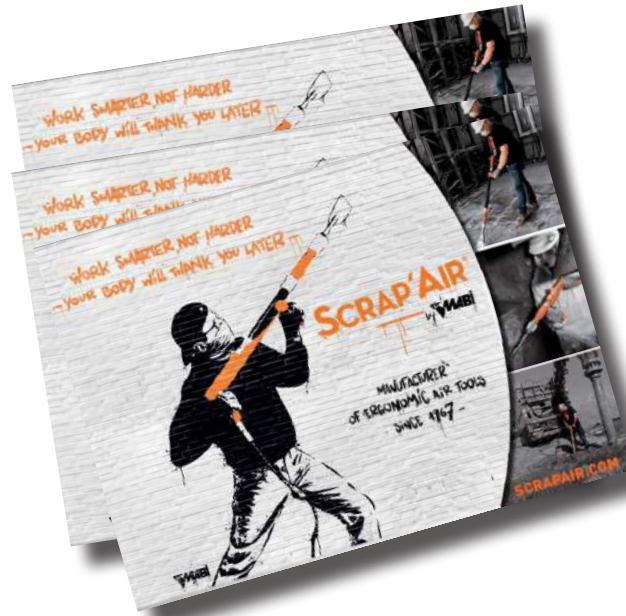

Field support & Training: Product demonstration and training is critical to validate the correct choice of equipment to guarantee customer satisfaction.

Marketing Strategy and brand visibility: Our expertise in creating high impact media, both physical and digital, supports our brand, helps to grow yours and creates new sales opportunities.

Support from sale to service: Application videos, tutorials and technical guides we offer complete resources for sales, operation and service of our products.

Maximise opportunity and expand your capability and offering with MABI Tools.

SALES & MARKETING

CUSTOMER SUPPORT

Premium After-Sales Service: Reliable & Responsive support.

At MABI customer satisfaction is our top priority. Team MABI is fully qualified to offer fast and efficient service to support any technical or service requirement.

Personal service: We believe in the personal touch and you can guarantee our expert technicians will be on hand to support and offer fast and efficient follow up.

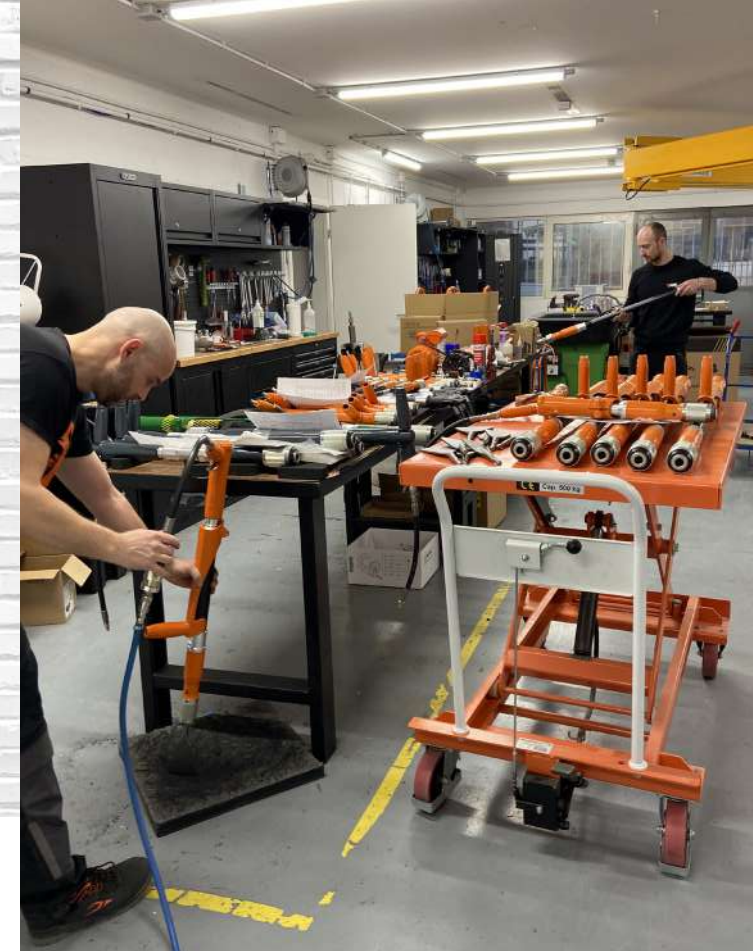

Service and Repairs: Our knowledgeable and experienced team can service and maintain all MABI equipment offering support and advice to keep your tools working at their optimal, reducing downtime and maintenance costs.

Fast Response: We understand when equipment is down for any reason it costs you money, we are available via email, phone and video conferencing to our customers globally to quickly resolve any issues no matter the cause.

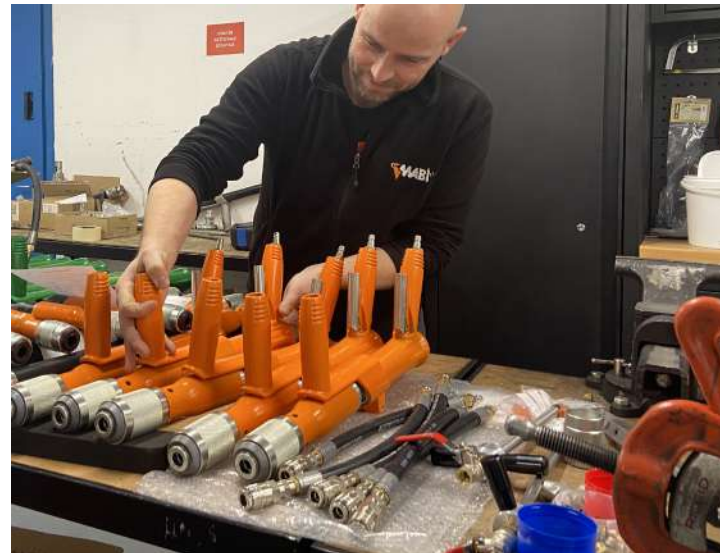

Tracking and traceability: Our serial number system allows us to track your product and quickly offer service, spares and information to keep tools working.

Spare parts and accessories: A fully stocked spares warehouse is critical to minimise downtime and maximise productivity.

With MABI you benefit from reliable, qualified support to guarantee our reputation for durable, efficient and cost effective equipment.

SALES & AFTER-SALES SERVICE

RENOVATION

Flooring

SCRAP' AIR 38

The S38 is ideal for floor renovation projects, Robust, powerful and ergonomic the S38 Long saves time and effort and making light work of stripping tiles, vinyl, carpet and wood. A range of attachments makes the S38 highly versatile and should be a key part of any flooring contractors equipment fleet. Low air consumption requiring just a portable compressor makes for a reliable, powerful tool which can be deployed in commercial and residential environments without the need for large generators or compressors.

Waterproofing

The S55 combines high impact with extended reach ergonomics for fast removal of tough waterproofing membranes and roofing material. The high breaking force allows the S55 V2 to strip tough membranes, demolish heavy ceramic tiles and scrape the hardest of adhesives and coatings. With V2 Anti Vibration Technology the S55 matches removal efficiency with features designed to ensure comfort and safety of the operator.

SCRAP' AIR 55

Asbestos

SCRAP' AIR 36

The S36 V1 combines a durable lightweight construction with a high blow frequency for the fast stripping of materials. Designed for renovation and cleaning tasks such as Asbestos abatement. With lightweight construction the S36 is perfectly suited for operating in confined spaces and at extended reach whilst wearing restrictive PPE. The optional dust extraction kit helps ensure a safe atmosphere with containment and reduced clean up.

INDUSTRIAL

Industrial

SCRAP' AIR 55

Designed for industrial demolition, stripping and cleaning operations the S55 short gives an impact energy of 35 Joules. Optimised for heavy applications such as cleaning ladles, furnace linings, insulation and concrete buildups the S55 is an ergonomic industrial tool making difficult tasks easier, more comfortable and efficient.

Maintenance

Infrastructure maintenance is an essential requirement to keep services running. Whether physical infrastructure such as bridges and building or assets such as railway coaches and wagons, the S38 with its multiple lengths and high power to weight is ideal for stripping and refurbishing the structures of our transport networks.

SCRAP' AIR 38

Industrial Cleaning

SCRAP' AIR 38

Concrete and many other construction and industrial materials are the foundations of our industries and infrastructure. Regular maintenance and up-keep ensures these critical facilities stay productive. The S38 is ideal for cleaning concrete plants, asphalt plants mixers and conveyors. With power, low weight and extended reach, the safe cleaning of equipment can be facilitated safely and efficiently.

EXCAVATION

Utility

SCRAP'AIR 55 T

S55T V2 Pneumatic Spade is designed with adaptability in mind. The quick-change chisel retainer allows the fast swapping between a range of attachments for cutting, excavation and compaction tasks. Durable lightweight construction combined with the efficient and powerful pneumatic design make it ideal for civil engineering applications such as utility, excavation and foundation underpinning. The Low air consumption allows for operation on truck-mounted or lightweight portable compressors, ideal for vacuum excavation and utility crews, complying with equipment weight and towing restrictions, increasing operational effectiveness at a reduced cost.

Landscaping

The S55T/D V2 Pneumatic Spade makes light work of landscaping in public spaces. For landscaping and municipality maintenance the S55T and S55D are the ideal excavation tools. A portable lightweight powered spade replaces manual digging increasing productivity and reducing manual effort. Lightweight and easily controlled, the S55T & D models allow for careful excavation around tree roots and other infrastructure. Low air consumption means pneumatic power can be truly portable requiring a small van mounted or portable compressor which can easily be deployed on site.

DUST EXTRACTION

THIS INNOVATIVE DEVICE IMPROVES WORKING CONDITIONS BY REDUCING DUST DISPERSION

VACUUM CONNECTION: 33 mm

LENGTH: 270 mm

WIDTH: 130 mm

WEIGHT: 870 g

BENEFITS

Versatility: Optimised to work with multiple width and style of chisel.

Manoeuvrability: Rotational coupling ensuring the hose does not interfere with the work.

Ease of use: rapid tool-free assembly/disassembly.

User comfort: Dust reduction for a healthier working environment.

Compatibility: Fits the locking ring of Scrap'Air 36 and 38 models.

Optimum handling: Rotational coupling allows free movement even with the hose in place.

Convenient, quick tightening: system designed for reliable, intuitive adjustment, ensuring effortless use.

Recommended use: Ideal for work requiring the use of pointed chisel and chisels.

HIGH QUALITY TOOLING

The quality of our tools along with their continuous development is appreciated by professional users throughout many industries and applications.

- Tempered steel with high resistance for a longer life.
- Grit blasted surface to protect against oxidation.
- Hexagonal shank to limit wear.

The chisel retainer offers an easier, safer and faster change of tools. According to their needs, the user will adapt the choice to the requested impact angle. Several applications for a single device.

The wide range of sizes, angles and blades provides a versatile range of options to ensure maximum productivity for each application.

- Wide and low impact angle chisels and blades protect the substrate and quickly strip and remove delaminating and brittle materials.
- A range of chisel widths allows the impact to be tailored to the hardness of the material, narrow chisels able to break and fracture hard materials while wider blades make fast work of many materials.

ADVANTAGES

Ergonomics

Angles for comfort

MABI tools are designed to perform in the most extreme conditions, offering versatility, ergonomics and reliability.

Lightweight, Powerful and Robust, they are your best ally in getting the most out of your work, in any environment.

Choose quality and comfort with our professional range, backed up by comprehensive support for unrivalled performance.

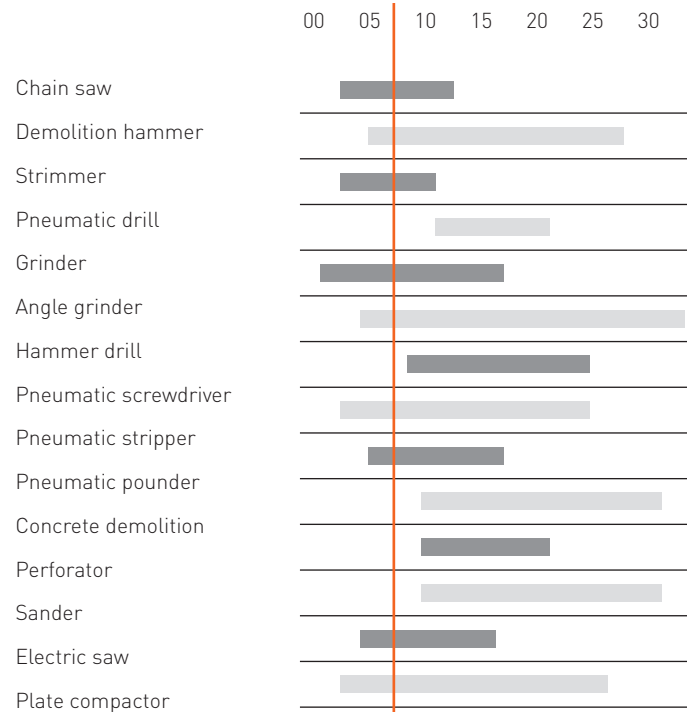

Safety

Protect your teams in the most extreme conditions with high-end professional tools, designed to ensure safety and reliability every time.

Be confident on site with our equipment, field-proven for over 50 years, equipped with anti-vibration systems and advanced ergonomics for optimum safety.

Invest in safety with our 2-year warranty, French manufacturing and expert after-sales service, guaranteeing the technical support you need.

ESTIMATION OF RISKS and wrist Comparison of vibration levels of common and authorised tools in the European Market.

Cost savings

Maximise your return on investment with our reliable, high-performance professional tools, designed to help you make money from day one.

Investing in our equipment means investing in efficiency and profitability: versatile, low-maintenance tools guaranteed to deliver long-term savings.

Choose profitability: save money while enjoying maximum productivity on all your sites.
